Activity - Diagram

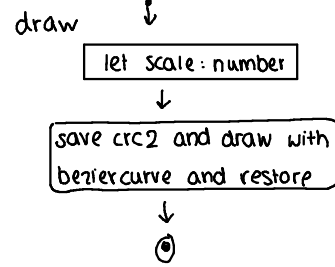

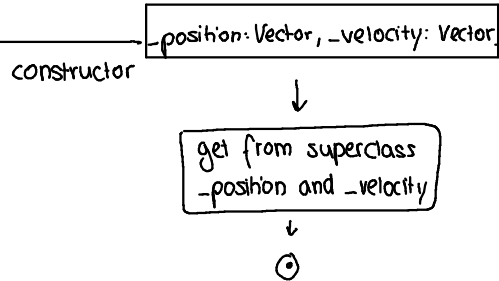

main

```
export let crc2: CanvasRenderingContext2D;
export let rotate: number;
let move: Movable[] = [];
let ImageData: ImageData;
let hitBox: number;
```

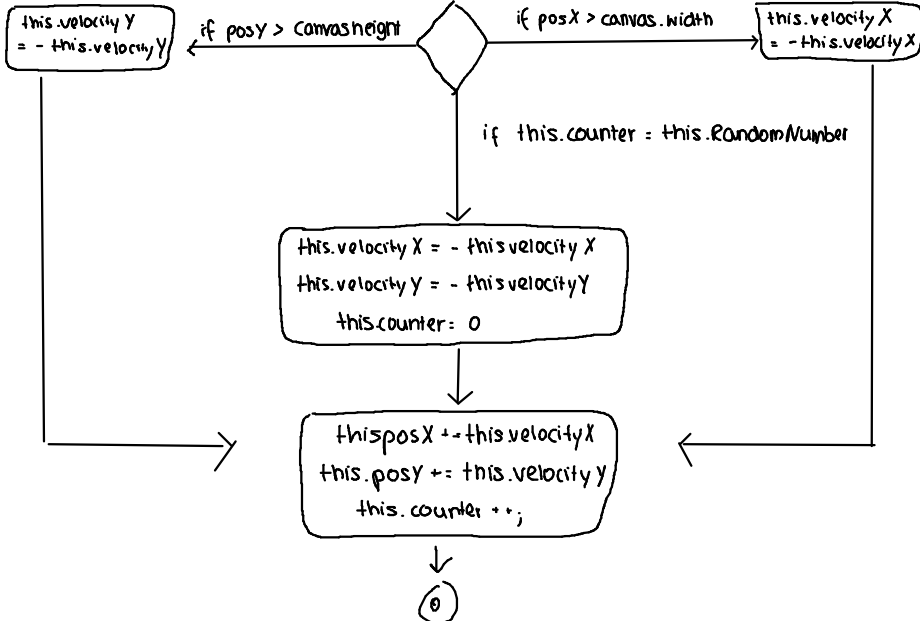

Birds — extends Moreate

randomNumber: number
counter: number = 0

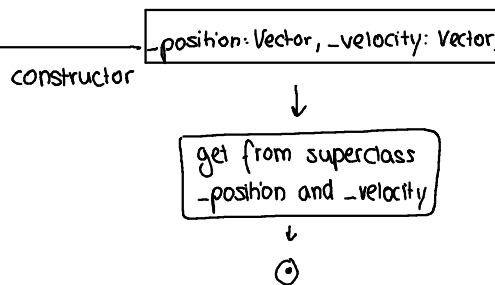

update

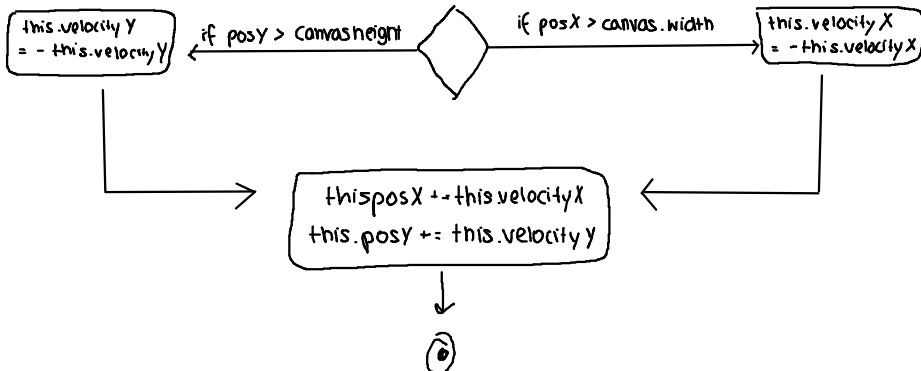

Boat — extends Moreate

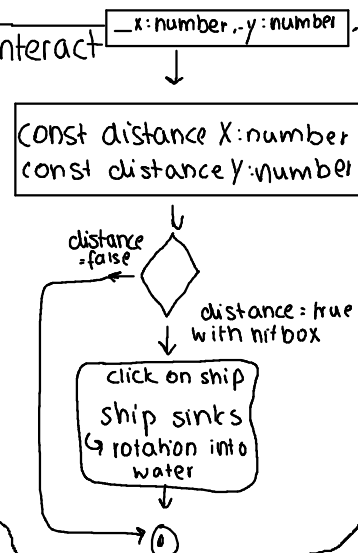

declare posX: number
declare posY: number
velocityX: number
velocityY: number
-x: number
-y: number

update

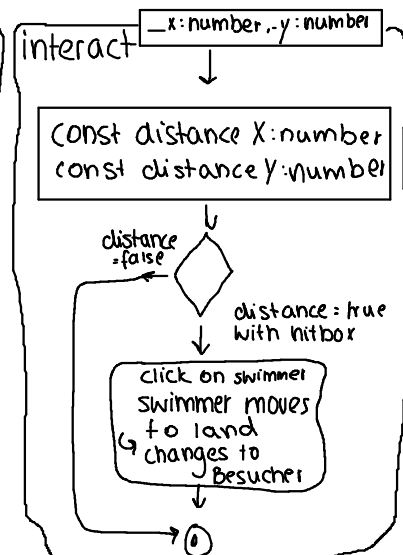

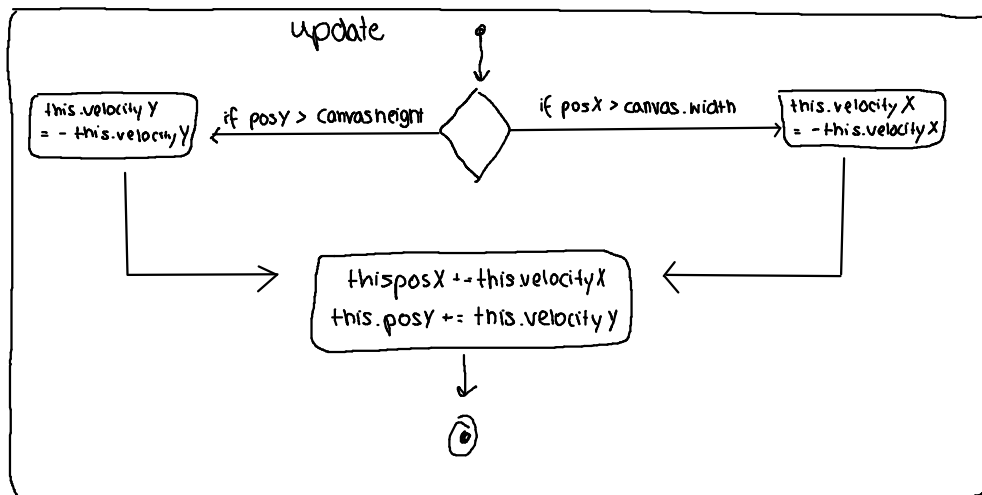

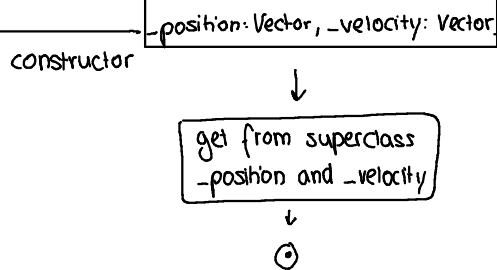

interact

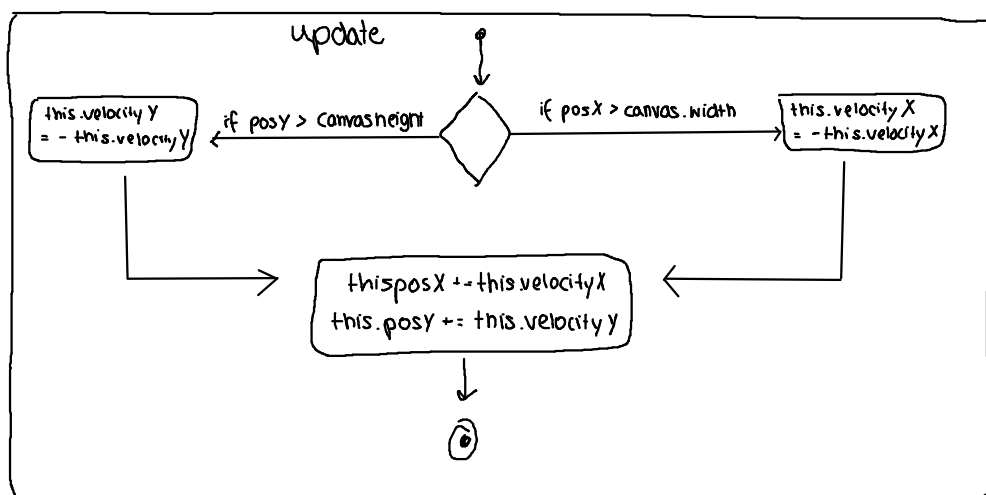

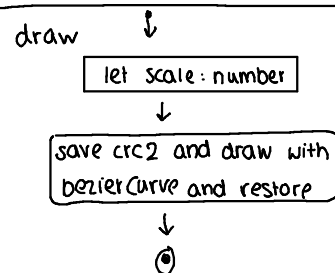

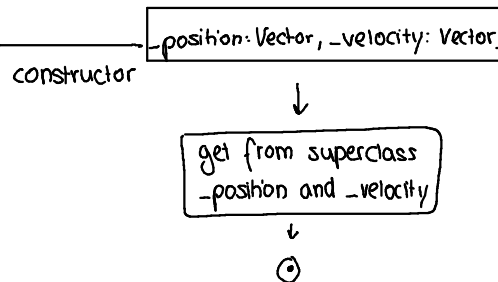

Swimmer extends Moreade

declare posX: number
declare posY: number
velocityX: number
velocityY: number
-x: number
-y: number

Cloud extends Moreade

declare posX: number
declare posY: number
velocityX: number
velocityY: number

Besucher

extends class moveable

declare posX: number
declare posY: number
velocityX: number
velocityY: number
_x: number
_y: number

constructor

-position: Vector, -velocity: Vector

get from superclass
-position and -velocity

draw

let scale: number

save ctx2 and draw with
arc, curve, line and restore

update

this.velocityY = -this.velocityY

if posY > canvas.height

if posX > canvas.width

this.velocityX = -this.velocityX

this.posX += this.velocityX
this.posY += this.velocityY

interact

-x: number, -y: number

const distanceX: number
const distanceY: number

distance: false

distance: true
with hitbox

click on Besucher
Besucher moves
to water
& changes to
swimmer
